PREFACE

25X1C

This MISSION COVERAGE INDEX (MCI) lists targets of intelligence interests covered by aerial photographic material from CHURCH DOOR [REDACTED] dated 12 June 1963. [REDACTED]

25X1C

25X1C

[REDACTED] A target description, based on photographic interpretation, is included for each target covered by the mission, except for those in which no significant change was observed.

25X1C

[REDACTED] 156 provided photographic coverage only in China. Targets in this MCI are arranged by WAC area within China and by coordinates within the WAC area, reading from south to north and from west to east. Column headings and photo reference data are explained in the appendix, and for the convenience of the recipient a subject index, in which targets are arranged by category and alphabetically by place name within the category, follows the listing.

25X1C

The recipient of this MCI is cautioned that the scan of photography from [REDACTED] was accomplished in a relatively short time and often without the aid of precise analytical and mensural equipment commonly employed in detailed photographic analysis. Consequently, although the information presented herein is essentially accurate, additional detailed analysis may somewhat alter portions of the information.

APPENDIX
EXPLANATION OF COLUMN HEADINGS
AND PHOTO REFERENCES

City, Installation -- This column contains the name of the city or town nearest the installation, followed by the name of the installation. If the name of the installation is not known, it is titled according to its function. Where appropriate, the city and installation names are followed by a capsule description.

Coordinates -- Coordinates are referenced to the SW corner of the minute square. When the subject installation covers a wide area, coordinates are given for the approximate center of the installation.

WAC -- This column provides the World Aeronautical Chart number for the area in which the subject installation lies.

Installation Numbers -- This column is divided into two subcolumns. The first subcolumn lists, when known, the BE installation number assigned to the target. The second subcolumn lists the installation number assigned by NPIC. Installation numbers, when used to reference an item, should be prefixed by the appropriate WAC number, since installation numbers are repeated from WAC to WAC. For example, there is an NPIC target number 0492-1 and an NPIC target number 0493-1. In each instance, the NPIC installation number is 1, but the installations appear on different WACs.

The photo reference indicates frame(s) on which the target appears and conditions which affect interpretation of the target.
